

MARTIN Claire

Student in Networks and Telecommunications
Apprentice software developer

I'm interested in computer science, and will be able to make myself useful by using the programming and project management skills I've acquired in my further training, and my experience as a software developer.

Personal information

Nationality : French

Date of birth : 13th of February 2002

Place of birth : Grasse, FRANCE

Contact

98, chemin des Oliviers, 06460

Langages

French ★★★★★
Mother tongue, C2 level

English ★★★★★
Upper Intermediate, B2 level

German ★★★★★
Elementary, A2 level

Skills

Technical

Programming languages : C, Python, Java

Web development : HTML, CSS, PHP

Database management : MySQL

Operating Systems : Linux, Unix, Windows

Configuring Cisco network equipments :
routers, switches, firewalls

Simulating a network : cisco packet tracer,
GNS3

Communication and project management :
Gantt Chart, Risk Analysis, RACI

Personal

Teamwork | Autonomous | curious | creative

Interests

- Computer sciences
- Arduino
- Art
- Astronomy
- Nature

Education

University Institute of Technology - Sophia Antipolis - FRANCE

Bachelor Universitaire de Technologie in Networks and Telecommunications.

2022 - Now

Equivalent to a three-year intensive course in networks, telecommunications, computer sciences and cybersecurity.
Including a sandwich course at Ineo Defense as a software developer.

ISEN Yncréa - Toulon - FRANCE

2020 - 2022

Equivalent to a two-year intensive course in mathematics, physics and engineering sciences.

Amiral de Grasse Highschool - Grasse - FRANCE

Baccalaureat S/SVT with honours - equivalent to A Levels in maths, Physics, Electronics, Chemistry, Biology

2017 - 2020

Mathematics speciality, arts option.

I took the Information and Digital Creation option, which led me to conceive a chameleon robot for the baccalaureate exams and obtained the highest grade for it.

Professional experience

Sandwich course in software development at INEO DEFENSE Valbonne -FRANCE

September 2023 - Now

My missions involve studying and implementing solutions for the security of the company's software and projects.

Study Project for Thalès Alenia Space - Sophia Antipolis - FRANCE

November 2023 - June 2023

- Recovered, analyzed and filtered a frame data from a raw binary file.
- Created and managed a database, a PHPMyAdmin server and Apache2 server to host the website on a Raspberry Pi 3.
- Wrote PHP requests and displayed the requested data on the website.

Additional Informations

- French spelling Diploma : Certificat Voltaire
- Deutsches Sprachdiplom - A2 level
